SUMMARY

Senior Software Architect with 25+ years of experience designing and scaling enterprise platforms across cloud, AI, media, ecommerce, and high-traffic web systems. Expert in cloud-native architecture, distributed systems, secure application design, and AI integrations spanning AWS, Azure, GCP, React, Python, and OpenAI-powered services. Proven track record of leading end-to-end delivery—from technical strategy and architecture through implementation, deployment, optimization, and long-term support.

CORE TECHNOLOGIES

Cloud & Architecture	AWS, Azure, GCP, Docker, CI/CD, Distributed Systems, Microservices
Frontend	React, Next.js, JavaScript (ES6+), TypeScript, Angular, Vue, HTML5, CSS3, SASS, Tailwind
Backend, Data & AI	Python, PHP (Laravel, Symfony), Ruby on Rails, Node.js, C#, Java, OpenAI, Machine Learning, Data Science, Tableau
Security, Databases & Testing	OAuth 2.0, OIDC, Azure AD, AWS Cognito, Secure API Design, MySQL, PostgreSQL, SQL Server, MongoDB, Doctrine, Eloquent, Git, Docker, PHPUnit, Jest

PROFESSIONAL EXPERIENCE

DELOITTE – Nashville, TN

Apr 2023 – Present

Senior Software Architect
www.deloitte.com

- Led architecture and development of enterprise-grade web and AI-enabled platforms, building scalable systems from the ground up using AWS, Azure, React, Python, and OpenAI services.
- Designed and implemented secure authentication and authorization frameworks using OAuth 2.0 / OIDC, integrating Azure AD and AWS Cognito across internal applications, VPN-secured environments, MCP servers, and distributed systems.
- Architected and deployed Model Context Protocol (MCP) servers, enabling secure, scalable AI-driven workflows and seamless integration with internal tools and enterprise applications.
- Conducted end-to-end validation and observability using MCP Inspector, ensuring protocol compliance, reliability, and performance of AI-enabled systems.
- Refactored and enhanced Tableau dashboards, improving performance, maintainability, and usability across analytics platforms.
- Built internal automation tools that reduced manual workflows and improved delivery efficiency across teams.
- Owned the full software development lifecycle, including architecture, design, implementation, testing, deployment, and post-production optimization.
- Implemented robust unit and integration testing strategies, improving system reliability and long-term maintainability.
- Designed scalable and cost-efficient cloud architectures, optimizing performance while controlling infrastructure costs.
- Authored comprehensive technical documentation to support onboarding, cross-team collaboration, and long-term system support.

MUSIC BATTLE X (MBX) / THE MUSIC HUTCH -

Aug 2025 - Present

Nashville, TN

Senior Software Architect / Founder / Creative Director

www.musicbattlex.com • www.themusic Hutch.com

- Architected and developed MusicBattleX.com, a full-stack music competition and battle platform powered by TheMusicHutch.com, originally launched in 2006.
- Led front-end architecture and development using React, JavaScript ES6+, Tailwind CSS, and responsive mobile-first design principles.
- Designed and implemented backend systems using Laravel, PHP, MySQL, REST APIs, authentication systems, voting systems, push notifications, and scalable content workflows.
- Developed cross-platform mobile applications for iOS and Android using Capacitor.
- Implemented cloud deployment pipelines, CI/CD workflows, DevOps automation, environment management, and production deployment strategies.
- Directed full QA testing efforts across desktop and mobile platforms, including user flows, battle systems, authentication, notifications, and media workflows.
- Worked closely with designers to implement Figma-based UI/UX designs with pixel-accurate frontend implementation.
- Served as Creative Director across the MBX ecosystem, overseeing branding, user experience, marketing direction, and product strategy.
- Collaborated with videographers, music producers, sound engineers, and creative teams to deliver high-quality multimedia experiences and promotional campaigns.
- Managed social media strategy, digital marketing campaigns, platform growth initiatives, and user engagement.
- Oversaw the full software development lifecycle from concept and architecture through launch, optimization, scaling, and ongoing feature development.

THE MADISON SQUARE GARDEN COMPANY – New

Apr 2019 – Apr 2022

York, NY

Lead Engineer

www.msg.com

- Led full-stack engineering for msg.com, supporting high-traffic consumer-facing platforms and digital experiences.
- Introduced PHPUnit testing with Docker, establishing repeatable, containerized testing workflows.
- Refactored backend systems to Doctrine ORM, improving code quality, maintainability, and testability using TDD practices.
- Enhanced search capabilities using AWS Elasticsearch, improving content discovery and performance.
- Developed a machine learning-based food recommendation system for the MSG venue app using Python, turicreate, and AWS Jupyter Notebooks.
- Built frontend features using React, Redux, and JavaScript ES6, supported by Jest unit testing.
- Worked within a modern stack including WordPress, PHP 7, MySQL, AWS, React, and Redux.

EARLIER EXPERIENCE

WEST ELM – Brooklyn, NY

Jun 2018 – Mar 2019

Senior Software Engineer

www.westelm.com

- Contributed to large-scale ecommerce platform development across mobile and desktop, modernizing frontend architecture.
- Improved core shopping experiences and implemented multi-buy bundle strategies.
- Built internal tools for product image optimization and merchandising workflows.
- Enhanced store locator functionality and implemented SEO improvements across Williams-Sonoma brands.
- Refactored legacy DOJO codebases to modern JavaScript ES6.
- Extended Adobe Experience Manager (AEM) backend functionality using Java 8 and JUnit.

DDB HEALTH – New York, NY

Sep 2017 – Mar 2018

Front-End Developer

www.ddbhealth.com

- Developed interactive healthcare applications using Angular, TypeScript, Electron, and Node.js.
- Delivered WordPress-based platforms and Veeva presentation systems for enterprise healthcare clients.

HIGH 5 GAMES – New York, NY

Aug 2016 – Feb 2017

Senior PHP Developer (Full Stack)

www.high5games.com

- Refactored legacy PHP5 systems to PHP7 and Laravel, creating reusable frameworks for future development.
- Decoupled frontend and backend logic, improving scalability and maintainability.
- Migrated MySQL queries to Laravel Eloquent ORM with seeds and migrations.
- Developed Facebook app integrations and modernized JavaScript codebases using ES6 and Gulp.

ADDITIONAL ROLES (SELECTED)

Gucci – Senior Developer (2011–2014)

- Built and maintained Gucci.com, mobile platforms, and a custom CMS using Ruby on Rails.

Nickelodeon / Nick Jr. / Noggin – Senior Developer (2007)

- Developed search platforms using Google Search Appliance for high-traffic media properties.

Condé Nast / CondeNet – Front-End Developer (2007–2008)

- Built interactive media experiences and authored technical specifications for editorial platforms.

Earlier consulting and contract roles include Sundance Channel, CDM Group, DraftFCB, Arc90, Trimerous LLC, and multiple agencies, delivering large-scale web, ecommerce, and media platforms.

EDUCATION

General Assembly (NYC) – Data Science / Machine Learning | Dec 2019 – Mar 2020

Python, K-means, Regression Models, Decision Trees, Random Forests, Neural Networks

Central Connecticut State University | Computer Science Major, Math Minor (2000–2005)

SELECTED ACHIEVEMENTS

- Led architecture of AI-enabled systems integrating OpenAI services and MCP protocols in enterprise environments.
- Delivered scalable cloud solutions across AWS and Azure for mission-critical applications.
- Reduced manual workflows and improved engineering efficiency through automation and system design improvements.
- Consistently owned and delivered end-to-end systems across enterprise consulting, media, and ecommerce.
- Architected and launched Music Battle X (MBX), a full-stack web and mobile music competition platform integrating React, Laravel, Capacitor, cloud infrastructure, multimedia workflows, and modern DevOps practices.
